

# COMPU POOL **INFINITY** SALT CHLORINE GENERATOR

- High velocity cell for superior performance & reduced cell cleaning
- Superior cooling function for power module
- 3 year warranty

**compupool**  
products

Compu Pool's Infinity Salt Chlorine Generator sets the benchmark in efficiency, control, convenience and reliability. The Infinity Series creates peace of mind for swimming pool owners as it provides a combination of automation and intelligence usually only found in commercial grade pool equipment.

Model Number	Output (g/hour)	Pool Size (L)	
		Tropical Climate	Temperate Climate
i-15	18	35,000	60,000
i-25	27	60,000	100,000
i-40	36	80,000	150,000
i-60	42	100,000	180,000

# The Infinity Series

Setting the benchmark in Salt Chlorination

- The Infinity can effectively run at a wide range of salinity, with a built in self regulating feature if the salt content becomes too high. Optimal salinity is 3500 PPM
- Easy to view OLED interface allows for faster checking of salt levels, sanitising output, water flow, water temperature and cell reversing
- The Infinity Series provides proprietary High Performance, Long Life Titanium Electrodes, coated with precious metal oxides for superior longevity and reliability
- New energy efficient transformer with a lower electrical consumption for a cheaper, greener performance
- Intelligent self cleaning is standard on all models
- The Infinity is simple and easy to install on new and existing pools
- SuperChlor mode for boosting chlorine output levels during peak time and winter mode for cold water operation

New cooling technology ensures the power module runs only marginally over ambient temperature

Latest technology OLED interface, for reliability and complete owner control

User friendly touch keypad, for convenience and easy usability

Cell plug that is easily removable from the power module. The cord is connected to the cell to avoid any chance of arcing or burning around the terminals

Genuine 50mm connections ensuring maximum internal flow rate and reduced pump back pressure

Housing is impact resistant with a high performance UV stabilised plastic to avoid cracking and distortion

Proprietary 'High Velocity' cell design for a superior electrolysis process and less cleaning of the cell blades

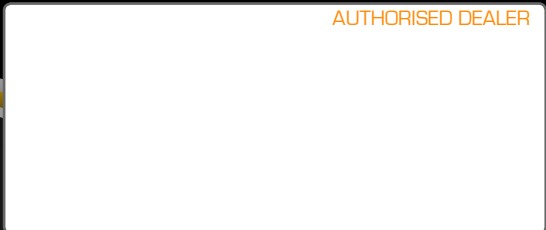

## HOW DOES IT WORK?

Salt is added to the pool water at 0.35% salt content. The slightly salinated water then passes through the electrolytic cell and this produces chlorine gas which prevents algae and purifies the pool or spa.

## WHY SALTWATER CHLORINATION?

Salt chlorination provides highly effective sanitisation performance without the drawbacks of expensive chlorine compounds, so you will no longer need to buy, transport, store or handle chlorine products, thus eliminating spills, accidents and costs. Due to the chlorine being pure, the odour, stinging eyes and irritated skin caused by additives in packaged chlorine are eliminated. Now safer, crystal clear water has never been easier.

Warranty - 3 years (2 years full, 1 year pro rata)
