Innovative Design

Master Craftsmanship

Trusted Brand

With increasing levels of automation and equipment on pools and spas, a pump is required that can handle moving water efficiently through your pool filter, salt chlorinator, in-floor cleaning systems or multi jet spas.

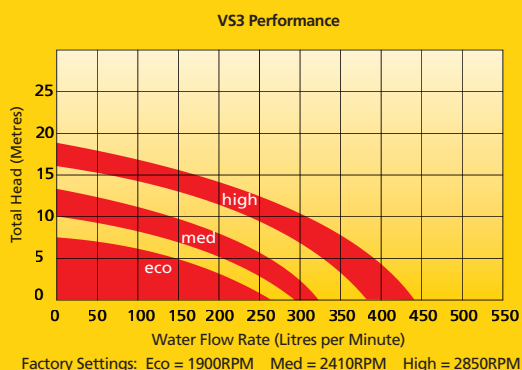

The VS3 pump enables pool and spa owners the choice of how to run the pump more economically in order to significantly reduce electricity costs and carbon emissions. It achieves this by using a permanent magnet brushless fully variable 3 speed DC motor. Each of the 3 speeds can be increased or decreased to suit their pool or spa, to save on electricity and increase filtration quality.

The VS3 operates at very low noise levels which allows it to be run at night to take advantage of off-peak tariffs without disturbing neighbours.

Warranty

Covered by a limited 3 year warranty against defects in materials and workmanship, the VS3-Series pool and spa pump is the perfect choice.
